Patient: PATIE	NT, TEST	Age:	25 (01/01/88)	Pathology #:	DPS-14-99999
Acct#:		Sex:	FEMALE	Epic:	1419329

Doctor: TEST DOCTOR M.D.

Date Obtained: 03/05/2014 Date Received: 03/06/2014

CLINICAL DATA: 795.02

SPECIMEN: A. CERVIX @ 6:00 BX B. CERVIX @ 8:00 BX C. ECC

DIAGNOSIS:

- A. CERVIX, BIOPSY AT 6:00: ACTIVE CHRONIC CERVICITIS WITH REACTIVE EPITHELIAL CHANGES.
- B. CERVIX, BIOPSY AT 8:00: SEVERE SQUAMOUS DYSPLASIA (CIN 3).
- C. ENDOCERVIX, CURETTINGS: MUCUS AND SCANT INFLAMED ENDOCERVICAL MUCOSA WITHOUT DIAGNOSTIC FEATURES OF DYSPLASIA.

NOTE: The patient is status post review of cervical cytology in February 2014 that showed atypical squamous cells, cannot exclude HGSIL (ASC-H). The previous cervical cytology, TPC-14-9998, is concurrently reviewed.

The cervical biopsy at 6:00 shows active chronic cervicitis with hyperplastic changes in the squamous epithelium, but without diagnostic features of squamous dysplasia. However, the cervical biopsy at 8:00 (images above) shows severe squamous dysplasia (CIN 3) with dysplastic changes that involve practically the entire thickness of the epithelium. The endocervical curettings contain a scant amount of inflamed endocervical mucosa without diagnostic features of squamous dysplasia.

GROSS DESCRIPTION: MTD:rad

- A Received in formalin in a container labeled with the patient's name only is a single irregular tan portion of soft tissue measuring 0.4 x 0.3 x 0.2 cm. The specimen is stained with eosin, wrapped in biopsy paper and entirely submitted in cassette A.
- B. Received in formalin in a container labeled with the patient's name only is a single irregular tan portion of soft tissue measuring $0.5 \times 0.4 \times 0.4$ cm. The specimen is stained with eosin, wrapped in biopsy paper and entirely submitted in cassette B.
- C. Received wrapped in a Telfa pad in formalin in a container labeled with the patient's name only is a 1.5 x 1.5 x 0.2 cm aggregate of clear mucoid material admixed with tan-brown flecks of soft tissue. The specimen is filtered through a biopsy bag and is entirely submitted in cassette C.

DVC:sas; 795.02

This report <u>may</u> include a photomicrograph of the slide under examination. For a variety of reasons, including the limitations of some electronic interfaces, the photomicrograph may not appear on the version of this report that you view. The photomicrograph is not of diagnostic quality and should not be relied upon by any professional. Health care professionals should rely only upon the pathologist's written interpretation.

Final Diagnosis performed by **Dario V. Caccamo, M.D.** Electronically signed 01/01/2014
